

Cooperation & Projects Coordination

UniProjet is an expert agency which provides quality training placements in the field of continuing education & training. Since January 2003, we have placed in Spain more than **941** people in the frame of **Leonardo Da Vinci mobility** projects (European Commission) for periods of 3 weeks to 6 months, in cooperation with companies and regional/national organisations.

We have coordinated projects and professional visits in the frame of the **ESF** programme and have managed seminars and conferences on very specific items.

We dispose of all the necessary resources in order to bring and propose immediate solutions which might be perfectly adapted to each person and situation and we also provide the trainees with the most suitable training in order to favour and promote their professional competitiveness at a European or international level.
